A 3D architectural rendering of a school interior. The ceiling features a complex arrangement of yellow structural beams, large silver ductwork, and several white pendant lights. The walls are composed of grey acoustic panels and brown wood paneling. In the foreground, there is a large, light-colored carpeted area with two bright, rectangular light patches. In the background, a long, low structure with teal and red horizontal stripes is visible, along with a basketball hoop and a white trash can.
